Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by the Applicant's Prior Art (APA). On page 3 of the specification Applicant discloses a prior art device in Japanese Utility Model Publication No. Hei 5-37532. The prior art device comprises a voltage supply device (main power source, sub-power source) that supplies power to the entire power amplifier in a second mode and supplies power to a sound level controller (a unit involved in setting the compensation functions and adjustment values) in a first mode. Under a broad interpretation, the device has means for setting the voltage supply device to a first mode when the device power is turned on and means for setting the voltage supply device to a second mode when the device power is turned on after setting on/off operation of compensation functions (sound level control) in a first mode and turning power off. The means for setting the voltage supply device is the remote control. (Although when the voltage supply device is turned on after the compensation functions are done and the power amplifier may consume a large amount of power when not in a standby mode, that does not preclude the means to switch back to the standby mode, which would qualify as the second mode.)

Allowable Subject Matter

Art Unit: 2644

Claims 2, 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4-10 are allowed.
